# STEERING you to the right SOLUTION

The **CAT09** allows you to replace the standard car audio system with a high performance car audio system, whilst maintaining the functions of the steering wheel mounted remote controls. Suitable for: Alpine, Clarion, Eclipse, JVC, Kenwood, Panasonic, Pioneer & Sony. To Holden VR-VS, VT-VX, VY-VZ, Barina XC, Astra TS, Vectra ZC and Ford AU1/2/3.

(Also available: CATALPRCC - in conjunction with the CAT09 allows direct plug-in, to select Alpine head units)

The **PACSWI-X** is a universal steering wheel interface that will allow the use of the factory remote controls to most infra-red remote control head units.

Suitable for most: Audi, BMW, Chrysler, Honda, Jaguar, Kia, Land Rover, Mazda, Mitsubishi, Nissan, Saab, & Toyota.

The **PACSWI-ELC** will interface with the factory steering wheel remote controls to an aftermarket Eclipse radio. The Eclipse unit must have remote control input wires. Suitable for most: Audi, BMW, Chrysler, Honda, Jaguar, Kia, Land Rover, Mazda, Mitsubishi, Nissan, Saab and Toyota.

The **PACSWI-ALP** will retain the use of the steering wheel remote controls when replacing the factory head unit. Works with selected Alpine head units. Suitable for most: Audi, BMW, Chrysler, Honda, Jaguar, Kia, Land Rover, Mazda, Mitsubishi, Nissan, Saab, & Toyota.

\*Solutions to come - 06 Chrysler, Citroen, Ford Focus, Fiat, Land Rover, Peugeot, Renault & 05 Astra\*
